VICTOR LEE CHIA SWEA

victorleecs@utexas.edu |+65 94593393

Objective: Full-stack developer with one year of experience working with Java, Spring Boot, React, and SQL. Currently pursuing a Master's degree with a background in computer science and mathematics. Looking for opportunities in software development and related technical roles where I can apply my skills and gain further experience.

EDUCATION

National University of Singapore, Singapore — Started Aug 2026
MS in Machine Learning and Data Science

The University of Texas at Austin, Austin, TX — Aug 2025 to May 2025
BS in Computer Science and BA in Mathematics, GPA 3.61/4.0

WORK EXPERIENCES

Cognizant, Singapore — Sep 2025 to Present
Full-Stack Software Developer

- Currently serving a banking client
- Built and maintained interactive UI components using React
- Developed and maintained **Java-based backend services** using **Spring Boot**, **JDBC**, and **JPA**
- Built **RESTful APIs** and integrated them with **frontend applications** for seamless data exchange
- Utilized **Core Java libraries**, including **Collections**, **JSON**, and **JDBC**, to implement efficient data handling
- Managed project dependencies and builds using **Maven**, ensuring smooth integration and deployment
- Worked with **Kafka** streaming services.

PROJECTS

Diabetic Retinopathy Decision Tree — June 2023

- Developed a decision tree classifier in Python UCI's Diabetic Retinopathy Debrecen dataset
- Achieved an accuracy of 60% through 5-fold cross-validation
- Applied knowledge of decision tree algorithms and data preprocessing techniques

Character-Based Language Model — April 2024

- Developed an LSTM neural network model in Python for character-based language modeling
- Generated coherent sentences based on input character sequences
- Implemented using PyTorch

PageRank — April 2024

- Implemented the PageRank algorithm in Python to rank webpages based on the structure of a directed graph.
- Used sparse graph representations to efficiently store and traverse large graph datasets.
- Parsed graph data and iteratively calculated page rankings until convergence.

SKILLS

Programming Languages: C, C++, C#, Java, Python, Swift, x86, ARM, R, Clojure, Pascal, HTML5, SQL
Programming Libraries/Frameworks: React JS, OpenMP, Matplotlib, Pandas, Scikit-Learn, PyTorch, TensorFlow, Spring Boot, Bootstrap, Jakarta EE
Actuarial Exams: Probability, Financial Mathematics, Statistical Risk Modelling
Others: Xcode, IntelliJ, Visual Studio Code, Eclipse, Node.Js, Firebase, GIT
